PLEASE TICK ✓	Strongly Agree	Agree	Disagree	Strongly Disagree
Following your placement, you are considering a career in General Practice.				
You are still considering other options such as speciality training.				
The placement affected or confirmed your career decision for the future.				
Had the opportunity to practice preventative and continuity care.				
Feel that you are more confident in working autonomously since your commencement of the placement.				
Your understanding of the Australian Healthcare system has improved.				
Found the working hours and style to be compatible with your lifestyle and out-of-work commitments.				
Able to see a wider range of patients and medical conditions than you initially expected.				
Would recommend PGPPP to fellow colleagues and friends				
Would undertake another placement if you had the opportunity.				
TEACHING AND LEARNING ENVIRONMENT				
Good practice models were demonstrated in teaching.				
Considered your supervision to be knowledgeable and interesting.				
Had access to resources such as Internet and literature.				
Received positive and constructive feedback from your supervisor.				
Had appropriate access to supervisors and advice.				
There were appropriate debriefing and discussion forums and opportunities.				
CLINICAL EXPERIENCE				
Felt satisfied with the responsibility you had when treating patients.				
Felt is was a positive 'hands on' experience.				
Opportunity to attain new procedural skills and engage in procedural medicine.				

PLEASE TICK ✓	Strongly Agree	Agree	Disagree	Strongly Disagree
There was the ability and opportunity to appropriately refer patients to specialists.				
Feel an appreciation for the difference between specialists and other healthcare professionals in treating patients.				
TRAINING ISSUES				
There was a fair daily schedule in respect to lengths and frequency of session times.				
Work was paced evenly.				
KEY RELATIONSHIPS				
Good professional relationships were established with colleagues i.e. practitioners within the practice.				
Good professional relationships were established with other key professionals i.e. consultants / specialists.				
There was capacity to factor in partner and family issues to the placement/training experience.				
SUPPORT				
You had an appropriate induction and orientation into the practice.				
There was adequate support from hospital staff on issues raised during the placement period.				
Appropriate mediation and personnel advisory infrastructure was in place to assist with issues raised during the placement i.e. concerns regarding work environment and supervision etc.				
Assistance was provided for personal emergencies and general well being.				
Recognition of gender and/or cultural considerations.				

Thank you for your time!
